TITLE 5—ADMINISTRATIVE PERSONNEL

Chapter I—Civil Service Commission

PART 27—TEMPORARY CIVIL SERVICE REGULATIONS

MISCELLANEOUS AMENDMENTS

Corrections are to be made in the regulations issued under this part (11 F. R. 1424) as follows:

§ 27.2 Classification of the service—
 (a) *Extent of the classified service.* * * * No right of classification shall accrue to persons whose appointment or assignment to classified duties is in violation of the civil service rules or regulations.

(e) *Apportionment.* The appointments of persons covered into the classified service under this section, by Executive order or otherwise, shall be exempted from the apportionment quota restrictions applied in certification. Such appointments shall be charged to the apportionment unless they fall in one of the categories which are excluded from the apportionment in original appointment under § 27.7.

(f) *Excepted employees; when classified.* * * *

(4) That until six months after the end of the war, as officially determined, this paragraph shall not apply to any person who received a war service appointment under § 18.5 (f) (1) or (2) of this chapter.

(5) That in conferring a classified competitive status upon any employee under this or any other rule, regulation, or any statute or executive order, the Commission: * * *

(g) *Classification in post offices.* * * * On the effective date of any such order, paragraph (f) of this section shall apply to the incumbents of positions affected by the order.

(h) *Appointment without competitive examination in rare cases.* * * * The appointment of persons who have been serving during the war period in highly specialized scientific or professional positions may be authorized without com-

petitive examination whenever the Commission finds that their retention in the service is essential to the programs in which they are engaged. * * *

(i) *Service beyond seas.* A citizen of the United States who has rendered faithful service for not less than seven years beyond the seas in a civil capacity not in contravention of the civil service laws, rules, or regulations may be given a classified status under such regulations as the Commission may prescribe upon certification by the head of the department or office in which he served that the case is one of exceptional merit: *Provided*, That shortly before such employment he resided for a substantial period of time in the United States.

§ 27.3 Examinations—(a) *Competitive examinations.* * * * *Provided further,* That where in the opinion of the Commission unlimited competition would result in far more eligibles than are required for the needs of the service, receipt of applications may be limited to that number which will meet the needs of the service for a reasonable length of time; in any such case of examinations for the departmental service in the metropolitan area, Washington, D. C., or of any other examinations where the area of competition extends beyond the boundaries of one state, the number of applications to be accepted from each state or territory or portion thereof that is included in the competitive area shall be in the same proportion to the total number of applications to be accepted as the population of the state or territory or portion thereof in the area of competition is to the entire area of competition.

(c) *Examinations for scientific, technical, or professional positions.* * * * No minimum educational requirement will be prescribed in any examination except for such scientific, professional, or technical positions, the duties of which the Commission decides cannot be performed by a person who does not have such education.

§ 27.4 Boards of Examiners—(a) *Appointment and duties.* * * *

(2) (i) In order to assure the maximum utilization of the resources of the departments and agencies in the departmental service in the metropolitan area Washington, D. C., in the recruitment and placement of persons for the Federal service, the Commission, after consulting the department or agency concerned, may for examinations for scientific, professional, or technical positions which are peculiar to a department or agency, establish United States Civil Service Committees of Expert Examiners in the departmental service in Washington, D. C., composed of not less than three officers or employees of the particular department or agency, who are of outstanding competence in the various professional, scientific, or technical fields for which examinations are held.

* * * * * § 27.5 Qualifications of applicants.

(c) Disqualifications. * * * (5) refusal to furnish testimony as required by § 27.14; * * *

§ 27.6 Rating and eligibility—(a) Rating. * * * In examinations where experience is an element of qualifications credit shall be given for all valuable experience, including experience gained in religious, civic, welfare, service, and organizational activities, regardless of whether any compensation was received therefor.

(b) Preference. In examinations for entrance into the service five points shall be added to the earned ratings of honorably discharged ex-service men and women who have served in any branch of the armed forces of the United States during any war or in any campaign or expedition (for which a campaign badge has been authorized).

(c) Eligible registers. (1) All persons rated at 70 or more in open competitive and reopened examinations shall be eligible for appointment. The names of eligibles shall be entered on appropriate registers in accordance with their ratings: *Provided*, That the names of eligibles granted ten-point preference under these regulations shall be placed at the top of the appropriate register except on registers for positions in the professional and scientific service for which the basic entrance salary is over \$3,000 per annum. The name of a preference eligible shall be entered ahead of all others having the same rating.

(2) When the Commission has established an eligible register for probational appointment for a particular position as the result of open competitive examination it may enter the names of the following classes of persons on such register

in accordance with the order prescribed in subparagraph (1) of this paragraph: Persons having a classified (competitive) civil service status and who (i) left a Government position to enter the armed forces of the United States or the Merchant Marine and who fail to be restored to their former positions after such service; (ii) were granted reemployment rights after war transfer but who have not been reemployed; (iii) have been declared eligible by the Commission after appeal from separation under section 14 of the Veterans' Preference Act of 1944; and (iv) because of reduction in force, since August 14, 1945, have been, or are about to be separated or furloughed for 90 days or more from a similar or higher grade position in the same line of work. Persons eligible under this subparagraph must apply to the Commission for entrance on the register and shall be examined under the same standards used in the open competitive examination.

(3) Prior to, and after the establishment of probational registers the Commission will submit the names of persons in subparagraphs (2) (i), (ii) and (iii) to departments and agencies for consideration for reinstatement or reappointment. Departments, agencies, and the Commission shall make a positive effort to place such persons in positions for which they are qualified.

* * * * * § 27.7 Certification—(a) Methods of filling vacancies.

(2) After establishment of register for probational appointment vacancies in any position for which an appropriate register of eligibles for probational appointment has been established shall be filled by noncompetitive action in accordance with §§ 27.9, 27.10 or 27.11 or by selection in accordance with this section from open competitive eligible registers: *Provided*, That whenever public announcement is made of an open competitive examination for filling a specific vacancy, except in the position of postmaster, such vacancy may not thereafter be filled noncompetitively by transfer, promotion, reassignment, or reinstatement, except that applications may be accepted by the Commission from persons eligible for promotion, transfer, reassignment or reinstatement who are recommended by the appointing officer at any time before appointment is made to the vacancy involved. The qualifications of such persons will be rated in accordance with the terms of the announcement and such persons may be reinstated, promoted, transferred, or reassigned to the position only if they are within reach for certification.

* * * * * (c) Selection.

(2) * * * If the reasons are found insufficient and the appointing officer still intends to appoint the nonpreference eligible, he shall, in conformity with the Veterans' Preference Act of 1944, submit either more detailed information concerning his reasons for passing over the preference eligibles or a statement that he has no more information in support of his selection. The nonpreference eligible tentatively selected may not be legally appointed except as provided in the fol-

lowing subparagraph until the appointing officer has received notification from the Commission concerning his second statement.

* * * * *

(e) *Apportionment*. Certification for appointment in headquarters offices of departments and agencies shall be so made as to maintain as nearly as the conditions of good administration warrant, the apportionment of appointments among the several States, Territories, and the District of Columbia upon the basis of population: *Provided*, That certification in the following cases shall be made without regard to the apportionment, and appointments in such cases shall be excluded from the apportionment figures:

(1) Certification of eligibles entitled to military preference.

(2) Certification for appointment to the following positions in all departments and agencies:

(i) Positions in headquarters offices which are located outside the metropolitan area of Washington, D. C;

(ii) Positions in the professional and scientific service for which the entrance salary is over \$3,000 per annum;

(iii) Apprentice positions in the recognized trades and skilled occupations;

(iv) Artisan and helper positions in all trades, occupations, and phases of the graphic and map reproduction arts that require trade knowledge and manual skill and effort in performance. Positions that require only clerical, technical, or professional knowledge in performance are not included;

(v) Positions of operating engineer, fireman, oiler, general helper, laborer, foreman of laborers, gardener, groundkeeper, animal keeper, chauffeur, truck driver, and telephone operator.

(3) Certification for appointment to all positions in the following establishments: The Government Printing Office, field offices of departments and agencies in the District of Columbia, field service of the military staff departments, and at Army Headquarters.

* * * * *

§ 27.8 Temporary appointment—(a) Pending regular filling of vacancy. Temporary appointment without examination and certification by the Commission shall not be made to a position in the classified service in any case, except when the public interest so requires, and then only upon the prior authorization of the Commission:

(b) *Pending establishment of register*. Whenever there are no eligibles upon a register for any grade in which a vacancy exists and the public interest requires that the vacancy be filled before eligibles can be certified, the Commission may authorize temporary appointment provided that the agency determines that the standards prescribed by the Commission are met. Such appointment shall continue only for such period as may be necessary to make appointment through certification, and in no case, without prior approval of the Commission, shall extend beyond thirty days from the date of the receipt by the appointing officer of the certification of eligibles.

(e) *Temporary appointment made probational.* The acceptance by an eligible of a temporary appointment shall not affect his standing on any register for permanent employment, and experience gained as a temporary shall in no way vary the order of certification for permanent appointment. A temporary appointment may be made permanent when the temporary appointee is within reach for permanent appointment at the time of his temporary appointment or in case he is so within reach during his temporary service. The probational appointment may date from the time when he came within reach for probational appointment. Such probational appointment may not be effected after expiration of the register except in the case of any person who meets the following conditions: (1) He shall have been appointed to a classified (competitive) position for other than temporary job employment lasting for one year or less, (2) his appointment shall have been prior to March 16, 1942, with respect to positions generally or prior to October 23, 1943, with respect to positions in the field service of the Post Office Department, and (3) the records of the Commission clearly show that he stood higher on an appropriate civil-service list of eligibles than another eligible who received an original probational appointment from such list.

(f) *Temporary appointments authorized by agency.* * * *

(1) Preference shall be given in appointment first to qualified persons entitled to 10-point preference under the Veterans' Preference Act of 1944, second to qualified persons entitled to 5-point preference under that act, and third to qualified former federal employees. Upon establishment before the Commission that this order of selection has not been followed in any case, the person appointed may be removed.

* * *
§ 27.9 *Reinstatement*—(a) *General requirements for reinstatement.* A person separated from a civilian position in the Federal service may be reinstated to a position in the classified service subject to the following requirements: * * *

(2) He must be reinstated within one year of separation if his period of service was less than two years, within two years if his period of service was two years or more but less than three years, within three years if his period of service was three years or more but less than four years, within four years if his period of service was four years or more but less than five years, but if his period of service was five years or more he may be reinstated without time limit after separation: *Provided*, That these time limits shall not apply to those former classified employees entitled to preference under the Veterans' Preference Act of 1944, or to those whose war service appointments may be converted to reinstatements under paragraph (d) of this section: *Provided further*, That the person is otherwise eligible under the Executive order of June 2, 1920, which limits the reinstatement of persons who are within ten years of retirement age.

* * *
(4) He must have the knowledge and abilities required for the performance of the duties of the position to which reinstatement is proposed and he must meet the same standards as are required for promotion or reassignment to the position.

(5) Proof of residence will be required for reinstatement to a position in the apportioned service. The applicant must be eligible under the apportionment quota restrictions unless he is entitled to preference under the Veterans' Preference Act of 1944 or has previously served in the apportioned service. The Commission may, upon request of the appointing officer, waive the apportionment when the reinstatement is in the interest of good administration.

(b) *Certificate required for reinstatement.* A certificate issued by the Commission will be required for reinstatement in the following cases:

(1) When the residence of the former employee proposed for reinstatement is in a state which is in excess of its quota and a waiver of the apportionment is desired.

(2) When the proposed reinstatement is to a position in a different line of work from or of a higher grade than the one from which separated unless the former employee could be promoted without prior approval of the Commission under § 27.11 (d), or unless he has been examined for the higher grade position by the appropriate office of the Commission subsequent to the effective date of this part.

(3) When the person proposed for reinstatement was removed for cause from his last position in the Federal or District of Columbia Governments, or when his removal was made at the specific request of the Commission because of his failure to meet conditions imposed at the time of his appointment.

(c) *Certificate not required for reinstatement.* Except as provided in paragraph (b) of this section, reinstatements of employees who meet the requirements of paragraph (a) of this section may be made by the departments and agencies without certificate of the Commission. Such reinstatements shall be subject to post-audit and the Commission, in its discretion, may disapprove any reinstatement, or suspend or withdraw this delegation of authority from any department or agency whenever it determines that the requirements of this section have not been met.

* * *
§ 27.10 *Transfer*—(a) *General requirements for transfer.* An employee occupying a position in the classified service may be transferred to another position in the classified service subject to the following requirements:

(1) He must have a classified (competitive) status at the time he is transferred, and have received an absolute appointment or have completed satisfactorily at least 6 months of service under a probationary appointment. If he is transferred before the completion of his probation, a probationary period of sufficient duration to complete his original probationary period will be required.

(2) He must have the knowledges and abilities required for the performance of

the duties of the position to which he is transferred and meet the same standards as are required for promotion or reassignment to the position.

(3) He must present an official notice of his actual or impending separation because of a reduction in force, an official notice of furlough, or an official release granted by his department or agency or, upon appeal, by the Commission.

(4) Proof of residence will be required in transfers from a position in the non-apportioned service to the apportioned service. The transferee must be eligible under the apportionment quota restrictions unless he is entitled to preference under the Veterans' Preference Act of 1944, or has previously served in the apportioned service. The Commission may, upon request of the appointing officer, waive the apportionment when the transfer is in the interest of good administration.

(b) *Certificate required for transfer.*

* * *
(2) When the transfer is to a higher grade position than the one in which the employee is serving unless he could be promoted without prior approval of the Commission under § 27.11 (d).

(3) When the transfer is to a position in a different line of work unless he has been examined for such position by the appropriate office of the Commission subsequent to the effective date of this part.

* * *
(c) *Certificate not required for transfer.* Except as provided in paragraph (b) of this section, transfers of employees who meet the requirements of paragraph (a) of this section may be made by the departments and agencies without certificate of the Commission. Such transfers shall be subject to post-audit and the Commission, in its discretion, may disapprove any transfer, or suspend or withdraw this delegation of authority from any department or agency whenever it determines that the requirements of this section have not been met.

* * *
(e) *Special transfers*—(1) *From the office of the President.* Any person who has served for at least 2 years in the immediate office of the President of the United States may be transferred to a classified position upon such tests of fitness as the Commission may deem proper.

(2) *From the Philippine service.* An officer or employee occupying a competitive position in the Philippine classified service who has served 3 years or more therein, may be transferred to the Federal classified service, subject to the provisions of this part; but the Commission may authorize the transfer of an officer or employee who has served 2 years in the Philippine classified service and who has been separated by necessary reduction of force or by displacement by a Filipino, if he is especially recommended by the Department of the Interior because of his efficiency and good character. In all cases of proposed transfer from the Philippine classified service the Interior Department shall furnish the Commission, for its consid-

eration, all relevant information contained in its files, together with the service record of the employee.

(3) *From the Puerto Rican service.* The Commission may, in its discretion, authorize the transfer of employees from the civil service of Puerto Rico to that of the United States, subject to the limitations respecting transfer within the civil service of the United States.

(4) *From the Panama Canal service.* A citizen of the United States in the service of the Panama Canal on or before January 1, 1915, in an excepted position may, if recommended by the Panama Canal, be transferred to any position in the classified service for which he can qualify. *Provided:*

(i) This subparagraph shall not apply to a person appointed to a competitive position in accordance with the civil service rules or regulations, the transfer of such person to be governed by the general provisions of the regulations.

(ii) This subparagraph shall not apply to a person appointed without examination to perform the duties of clerk of any grade, bookkeeper, stenographer, typist, surgeon, physician, trained nurse, or draftsman.

(iii) The transferee has rendered at least 2 years of service in a position above the grade of unskilled laborer in the service of the Panama Canal or of the Panama Railroad by transfer from the Panama Canal.

§ 27.11 Promotion—(a) Requirement for promotion. (1) No employee shall be promoted or reassigned to a position in the classified service unless he has a classified (competitive) status and unless he has the knowledge and abilities required for the performance of the duties of the position to which he is proposed for promotion or reassignment.

(2) Proof of residence will be required in promotions or reassessments from a nonapportioned position to an apportioned position. The apportionment shall be observed in promotions or reassessments unless the employee is entitled to preference under the Veterans' Preference Act of 1944 or has previously served in the apportioned service. The Commission may, upon request of the appointing officer, waive the apportionment when the promotion or reassignment is in the interest of good administration.

* * * * *

§ 27.12 Removals and reductions—(a) Procedure to be followed. * * *

(2) *Employees entitled to military preferences.* The regulations governing appeals to the Commission under section 14 of the Veterans' Preference Act of 1944 (Part 22 of this chapter, 5 CFR, 1945 Supp., 10 F.R. 12181) shall be followed in connection with the removal, suspension for more than thirty days, furlough without pay, or reduction in rank or compensation of any employee entitled to five- or ten-point preference under this part.

(b) *Like penalties for like offenses.* In making removals or reductions, and in other punishment, like penalties shall be imposed for like offenses, and no discrimination shall be exercised for political or religious reasons, or because of

marital status, race, creed, color, or national origin.

(c) *Suspensions.* Pending action under paragraph (a) (1) of this section, or for disciplinary reasons, an employee may be suspended for a period of not to exceed 90 days: *Provided,* That no permanent or indefinite employee entitled to five- or ten-point preference under this part who has completed a probationary period shall be suspended for more than thirty days except in accordance with the regulations governing appeals to the Commission under section 14 of the Veterans' Preference Act of 1944. The reasons for such suspension shall at the time of the suspension be filed in the records of the department or agency concerned and copies shall be furnished the Commission upon request. The period of suspension may be extended beyond 90 days with the prior consent of the Commission.

(d) *Power to investigate.* Except for cases referred to in paragraph (a) (2) of this section, the Commission shall have no jurisdiction to review the findings of a removing officer upon the charges and answer provided for in paragraph (a), nor shall the Commission have authority to investigate any removal or reduction, unless it is alleged, with offer of proof, that the procedure required by paragraph (a) of this section has not been followed, or that the removal was made because of marital status, race, or for religious or political reasons. However, an employee who has been removed on charges shall not for that reason be ineligible for further employment in the classified service but his suitability for further employment shall be determined by the Commission upon receipt of an official request for his reinstatement, or when he files application for an examination.

(e) *Reduction in force.* When reductions in force are being made in any part of the classified service competing employees shall be released in accordance with the retention preference regulations issued by the Commission pursuant to section 12 of the Veterans' Preference Act of 1944 (Part 22 of this chapter, 5 CFR, 1945 Supp., 10 F.R. 1218).

* * * * *

§ 27.13 Report of changes. * * *

(b) *List of positions.* Such officers shall also furnish to the Commission, when requested, and in such manner as it may prescribe, information as to numbers of employees, pay-roll data, and a list of all the positions, and employments under their authority, together with the names, designations, compensations, duties, and dates of appointment or employment of all persons serving therein.

* * * * *

§ 27.16 Transition promotions, transfers, reappointments—(a) Coverage—(1) Positions. This section shall apply to positions in the classified service for which no appropriate register of eligibles for probationary appointment has been established. When the Commission has established a probationary register for a particular position paragraphs (b), (c), and (d) of this section shall cease to be operative with respect to all positions for which that register is an appropriate source of eligibles.

(2) *Employees.* This section shall apply to any civilian employee or former employee of any agency in the executive branch of the Federal government, the General Accounting Office, the Government Printing Office, the District of Columbia Government, or the Administrative Office of the U. S. Courts.

(b) *Promotion, intra-agency transfer, and reassignment.* Any employee to whom this section applies who is serving under a war service indefinite, probational, or permanent civil service appointment, or under § 27.8 (b), may be promoted, transferred, or reassigned within the same department or agency without prior approval of the Commission, subject to such standards, limitations, or exceptions as may be issued by the Commission.

(c) *Inter-agency transfer.* Any employee to whom this section applies who is serving under a war service indefinite, probational, or permanent civil service appointment may be transferred without prior approval of the Commission: *Provided,* That the employee presents an official (1) notice of actual or impending separation because of reduction in force, or (2) notice of furlough, or (3) release for employment elsewhere issued by the agency in which employed, or by the Commission: *Provided further,* That the transfer is to a position in the same or equivalent grade, a lower grade, or to a higher grade than the one in which the employee is serving if the employee meets the requirements for promotion to such position.

(d) *Reappointment.* (1) A former employee to whom this section applies who has been separated for less than 30 calendar days may be reappointed without prior approval of the Commission subject to the same conditions prescribed in paragraph (c) of this section for inter-agency transfer.

(2) A former employee to whom this section applies who has restoration rights after military or merchant marine service, or reemployment rights after war transfer, in a Federal agency but who has not been restored or reemployed by such agency, may be reappointed by another agency without prior approval of the Commission: *Provided,* That he is reappointed to a position in the same or equivalent grade, a lower grade, or to a higher grade than the one in which he formerly served if he meets the requirements for promotion to such position: *Provided further,* That he applies for such reappointment within the same period as would be required for restoration or reemployment in the agency in which he has such right.

(e) *Reinstatement.* A former employee who is not eligible for reappointment under paragraph (d) (1) of this section may be reinstated in accordance with § 27.9 if he meets the requirements of that section.

(f) *Trial period.* Persons who are serving a trial or probationary period when promoted, reassigned, or transferred under this section will complete their trial or probationary period in the new position. Persons reappointed under this section who were serving a trial or probationary period at the time of sep-

eration from their last positions will be required to complete their trial or probationary period in the position to which reappointed. No trial or probationary period will be required in other promotions, reassessments, transfers, and reappointments under this section.

(g) *Status of employees.* The civil service status and tenure of an employee will not be changed by virtue of promotion or reassignment under this section.

In all transfers under this section the employee shall retain for all intents and purposes under the civil service laws, rules, and regulations the same civil service status which he had in the agency from which he was originally transferred. No employee who has been transferred from a probational or permanent civil service appointment during the period the War Service Regulations were in effect, or who is transferred under this section, shall, by reason of such transfer, lose his right to permanent tenure as a classified civil service appointee. No time limit administratively placed on the appointment to the position to which transferred shall affect the employee's rights to permanent tenure as a classified civil service appointee in the agency in which employed unless he was transferred to a position with a time limitation of one year or less.

Any employee who, on or after March 16, 1942, was appointed or reappointed under the War Service Regulations, or who is reappointed under this section, within 30 calendar days after separation from a probational or permanent civil service appointment, shall be entitled to the same benefits he would have had under reinstatement in accordance with Part 9 of this chapter (Civil Service Rule IX). Such an employee has permanent tenure as a classified civil service employee in the agency in which employed unless he was appointed or reappointed with a time limitation of one year or less.

An employee reappointed under this section will have the same civil service status and tenure in the agency to which reappointed as he had in the agency in which he last served unless he was reappointed with a time limitation of one year or less.

Any transfer or reappointment of an employee who was originally appointed "subject to investigation" will be subject to the results of the investigation.

Any transfer or reappointment of an employee who has been recommended for classification in his former position, and whose suitability for classification was under investigation, shall be subject to the results of such investigation.

(h) *Reemployment benefits.* (1) Any person, except one who was holding a temporary position, who was transferred by the Commission with reemployment rights under authority of Executive Order 8973 (3 CFR Cum. Supp.) or 9067 (3 CFR Cum. Supp.) or War Manpower Commission Directive No. X, and who is subsequently involuntarily furloughed or separated without cause such as would reflect upon his suitability for employment in the Federal service or who meets the conditions of subparagraph (6) of this paragraph, shall be entitled to the

rights specified below, provided he is still qualified to perform the duties of his position and that he makes application for reemployment within forty days after the termination of his services, but in no event later than six months after the end of the war is officially determined; * * *

In section 27.16 (h) change the numbering of subparagraphs (1) (iii) to (2), (1) (iv) to (3), (1) (v) to (4), (1) (vi) to (5) and (1) (vii) to (6).

Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders)

PART 930—MILK IN THE TOLEDO, OHIO, MARKETING AREA

ORDER SUSPENDING CERTAIN PROVISIONS

Pursuant to the applicable provisions of Public Act No. 10, 73rd Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), hereinafter referred to as the "act," and of the order, as amended, regulating the handling of milk in the Toledo, Ohio, marketing area, it is hereby determined that the provisions of such order which provide seasonal minimum prices on Class I milk and Class II milk, respectively, during April, May, and June 1946, are provisions which obstruct and do not tend to effectuate the declared policy of the act with respect to producers of milk under such order.

It is, therefore, ordered. That the following provisions of the order, as amended, regulating the handling of milk in the Toledo, Ohio, marketing area be suspended for the period as of the beginning of April 1, 1946, and extending through June 30, 1946:

1. In § 930.5 (a) (1), the words "during the delivery period of June 1942; and thereafter add the following amount per hundredweight:

Delivery period:	Amount (dollars per hundredweight)
July through March	0.90
April, May, and June	.80

and

2. In section 930.5 (a) (3), the words "except during the months of April, May, and June, when the Class III price shall be the price determined pursuant to sub-paragraph (4) of this paragraph, less 10 cents."

PART 1220—FEED

WHEAT MILL FEED QUOTAS AND RECEIPTS

War Food Order No. 9, as amended (11 F.R. 669), is hereby further amended as follows:

1. By adding immediately after paragraph (a) (16) the following new paragraph:

(17) "Wheat mill feeds" means those by-products usually obtained in the commercial process of flour milling, commonly designated as wheat bran, wheat middlings, wheat shorts, wheat red dog, bran and middlings (mill run wheat feeds), and low grade feed flour.

2. By adding immediately after paragraph (d) (2) the following new paragraph:

(3) Effective April 1, 1946, no person shall, during any calendar quarter, receive or accept wheat mill feeds, or offer to receive or accept the same, whether by purchase and sale, trade, barter, gift, loan, exchange, or otherwise, in any quantity which will cause his total receipts of wheat mill feeds during such calendar quarter to exceed one-sixth of his total receipts of wheat mill feeds during the calendar year 1945.

3. By adding immediately after paragraph (s) the following new paragraph:

(t) *Restrictions on use of wheat mill feeds.* No person shall, during any calendar month, use wheat mill feeds in the manufacture of mixed feeds, including poultry feed, in excess of two-thirds of the quantity of wheat mill feeds so used by such person during the corresponding calendar month of 1945.

Paragraph 2 of this amendment, relating to the receipt or acceptance of wheat mill feeds, shall become effective at 12:01 a. m., e. s. t., April 1, 1946. [General Wage Approval 2]

PART 805—GENERAL WAGE APPROVALS**STEEL INDUSTRY AND RELATED INDUSTRIES**

§ 805.2 Granting of pre-approval for wage and salary adjustments designed to eliminate intraplant inequities in plants and related plants. (a) Section 5 of General Order No. 1 issued February 21, 1946 (11 F.R. 1892), by the Stabilization Administrator pre-approved any wage increase not in excess of 18½ cents per hour above the rate paid by an employer on August 18, 1945, to employees in certain classes of plants in the basic steel and certain related industries as described in such order.

(b) The National Wage Stabilization Board recognizes that wherever an employer institutes wage increases which are approved under section 5 of General Order No. 1, such employer may find it necessary to institute similar or related adjustments for other employees in the same plants who are under the jurisdiction of the National Wage Stabilization Board but are not covered by the provisions of section 5 of General Order No. 1 of the Stabilization Administrator. Accordingly, the Board hereby grants pre-approval for any such wage or salary increase for employees in any of the plants covered by section 5 of such General Order No. 1, but who are not covered by the terms of that order, to the extent such increase is not in excess of 18½ cents per hour above the wage or salary rate paid by the employer on August 18, 1945.

(c) This pre-approval is limited to wage or salary increases to employees whose wages or salaries are subject to the jurisdiction of the National Wage Stabilization Board.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 13, Direction 14]

DISPOSAL OF CERTAIN COTTON FABRIC FOR USE IN THE MANUFACTURE OF RUBBER AND CANVAS FOOTWEAR

The following direction is issued pursuant to Priorities Regulation 13:

(a) *Effect of this direction.* There is an urgent need for cotton fabric suitable for use in the manufacture of rubber and canvas footwear of vulcanized construction, since cotton fabric is not readily obtainable in sufficient quantities from new production.

The purpose of this direction is to make available immediately for the above uses approximately 350,004 yards of 7.5 oz., unbleached cotton drill, now held by the War Assets Corporation as surplus property under declaration No. 6-21682; and approximately 276,000 yards of 4.6 oz., 41" bleached 68/74 sheeting, now held by the War Assets Corporation as surplus property under declaration No. 2-12984. It permits sales of these lots of cotton fabrics to be made by the War Assets Corporation only to persons permitted to purchase under paragraph (b) below.

Although this direction restricts sales to persons who will use the fabric for the purposes specified, it does not prohibit the War Assets Corporation from making sales, to the persons and for the purposes specified, upon such other terms and in such quantities as the War Assets Corporation may determine; and preference ratings have no effect upon any sales which may be made by the War Assets Corporation either by way of obliging it to sell or by way of determining as among the several buyers permitted by this direction, who shall get the cotton fabric from the War Assets Corporation.

(b) *Persons who may purchase.* No person may buy from the War Assets Corporation any of the surplus cotton fabrics referred to in paragraph (a) above, and the War Assets Corporation may not sell any of such fabric except where the purchaser is a manufacturer of rubber and canvas footwear of vulcanized construction and gives a certificate with his

purchase order in substantially the following form:

The undersigned certifies to the seller and CPA and subject to the criminal penalties of section 35 (A) of the United States Criminal Code, that (i) he is a manufacturer of rubber and canvas footwear; and (ii) the fabric obtained under this purchase order will be used only for the manufacture of rubber and canvas footwear of vulcanized construction.

The standard certification in Priorities Regulation 7 may not be used instead of this certificate.

(c) *Obligations of persons giving certificates.* Any person giving the certificate described above may obtain and use the fabric he gets with the certificate only in accordance with its terms.

(d) *Expiration date.* Unless sooner revoked, this direction shall expire on March 31, 1946; but its expiration at that time shall not relieve any person who has obtained cotton fabric by use of the certificate referred to above, from the obligation of using the fabric in accordance with the certificate which he has given.

Issued this 6th day of March 1946.

Mar. 8, 1946]**SPECIAL PROVISIONS FOR ASSIGNMENT OF CC RATINGS IN ORDER TO INCREASE PRODUCTION OF LUMBER, LOGS, PULPWOOD, SOFTWOOD VENEER, SOFTWOOD PLYWOOD AND MILLWORK**

The following direction is issued pursuant to Priorities Regulation 28:

(a) The supply of lumber, logs, pulpwood, softwood veneer, softwood plywood and millwork is substantially less than present and anticipated requirements; and this shortage is so serious as to threaten the required expansion in construction. This shortage is, therefore, a serious threat to the economy of the country during the reconversion period. Consequently, the Civilian Production Administration will assign CC ratings as provided in paragraph (d) (1) (iii) of Priorities Regulation 28 in accordance with the conditions of this Direction, where necessary to maintain or expand the production of lumber, logs, pulpwood, softwood veneer, softwood plywood and millwork.

(b) *Lumber, log, pulpwood, softwood veneer, softwood plywood and millwork producers—(1) Capital equipment.* CC ratings may be assigned to lumber, log, pulpwood, softwood veneer, softwood plywood producers, and producers of housing millwork for capital equipment other than "special equipment" where the producer is unable to obtain delivery without a rating, and

(i) The equipment will result in substantial increase in production or maintain the present rate of production, or

(ii) The equipment is needed to replace the present operating equipment which is in danger of imminent breakdown.

CC ratings may be assigned to the delivery of "special equipment" only for replacement in case of an irreparable breakdown and resultant loss in production or where it is determined that a rating is necessary to expedite delivery of such special equipment in

preference to delivery of other equipment for less important purposes.

(2) *Construction.* CC ratings may be assigned for materials which cannot be obtained without ratings and where required for expansion of existing plants.

(3) *Maintenance, repair and operating supplies.* CC ratings may be assigned for maintenance, repair and operating supplies needed by lumber producers, log producers, pulpwood producers, producers of softwood veneer, producers of softwood plywood, and producers of housing millwork (suitable for house construction), where the producer demonstrates that he is unable to obtain the items without priorities assistance.

(c) *Definitions.* (1) "Special equipment" means equipment which is produced only for use in logging or sawmill operations.

(2) "Lumber producer" means the operator of any plant, stationary or portable, which produces lumber not further manufactured than by sawing, resawing, passing lengthwise through standard planing machine, cross-cutting to length and working. The term does not include any establishment known in the trade as a "distribution yard", engaged in either retail or wholesale business, even though it may process lumber for the servicing of special orders from customers.

(3) "Log producer and pulpwood producer" means any person engaged in the felling or bucking of trees or the transportation of the yield from the felled trees from the woods to other points at which such output is delivered for manufacture or shipment.

(d) *Denials of CC ratings.* The CC rating will be denied where it appears that the item for which a CC rating is requested is available, but under different terms of sale or from a supplier other than the applicant's customary supplier.

(e) *PR 28 still applies.* In any case not covered by the above, CC ratings will be assigned only as provided in Priorities Regulation 28.

Issued this 8th day of March 1946.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 32, as Amended Mar. 8, 1946]

INVENTORIES

(a) What this regulation does.

General Restrictions

(b) Restriction on delivery.

(c) Restrictions on receipts.

(d) Restriction on ordering more than needed.

(e) Adjusting outstanding orders when requirements change.

(f) Restriction on processing.

Exceptions

(g) In general.

(h) Receipts permitted after contract cancellations or cut-backs.

Miscellaneous Provisions

(1) Previous inventory authorizations.

(j) Separate inventories.

(k) Redistribution of excess inventories.

(l) Violations.

(m) Revisions of tables.

(n) Appeals, letters and questions.

§ 944.53 Priorities Regulation 32—(a)
What this regulation does. This regulation contains the inventory rules formerly in § 944.14 of Priorities Regulation 1 and in CMP Regulation 2. Its purpose is to prevent excessive inventories by restricting ordering, deliveries, receipts and processing of materials in short supply. All kinds of materials are covered including raw or semi-fabricated materials, commodities, equipment, accessories, parts, assemblies or products of any kind, whether or not acquired with priorities assistance.

The general rule on receipts is in paragraph (c) (1), and this is controlling unless a more specific limitation or exception is indicated in Table 1 or 2 or a direction to this regulation, or unless Table 3 (formerly Order M-161) exempts the material entirely. Other exceptions to the inventory limitations are stated in paragraphs (g) and (h) and in directions to this regulation.

General Restrictions

(b) *Restriction on delivery.* No person may deliver any material if he knows or has reason to believe that acceptance of the delivery would be in violation of this regulation.

NOTE: For rule on making or delivering material earlier than required by customers, see Interpretation 3.

(c) *Restrictions on receipts—(1) General rule.* A person may not accept delivery of any material if his inventory of that material is, or will be, more than a practicable minimum working inventory reasonably necessary to meet his own deliveries or to supply his services on the basis of his current or scheduled method and rate of operation.

NOTE: For rule on when material is considered to be in inventory, see Interpretation 4; for rule as to seasonal industries, see Interpretation 1.

(2) *Special rules in Tables 1 and 2.* If Table 1 at the end of this regulation shows a special inventory limit on a particular material or product (either specifically or by reference to another CPA order or regulation), that limitation governs and the restrictions of paragraph (c) (1) above may be disregarded unless the applicable order or regulation (or a note in Table 1) also states that a practicable minimum working inventory may not be exceeded. The same is true with respect to particular classes of persons shown on Table 2. Where a specific period of time is shown on Table 1 or 2, no person affected may accept delivery of any material specified if his inventory of it is, or will be, more than he needs during the immediate period specified on the basis of his current or scheduled method and rate of operation. Even if an order or regulation is not listed on Table 1 or 2, any specific inventory limits imposed by it must be complied with. If an order or regulation listed on Table 1 or 2 is revoked or a listing removed from the tables all provisions of this regulation, including paragraph (c) (1), are automatically applicable.

(3) *Early delivery of steel, iron products, copper and copper base alloys.*

Early delivery, up to 15 days before the requested delivery month, may be accepted from a producer of steel, iron products, copper or copper base alloys (in the forms listed on Table 1), but the producer may not make the early delivery if it would interfere with any rated orders. Other special rules on these materials are explained in Table 1.

(d) *Restriction on ordering more than needed.* (1) A person may not place any order, whether rated or unrated, for delivery of any material on earlier dates or in larger amounts than he would be permitted to receive under this regulation. Orders aggregating more than he is allowed to receive may not be placed with different suppliers even though he intends to cancel one or more of them before delivery. However, this restriction does not apply to materials listed on Table 3 of this regulation nor to purchases by ultimate consumers for personal or household use. The restriction does not forbid the placing of orders for delivery under the conditions explained in Interpretation 11 to Priorities Regulation 1, but such orders may not be scheduled for production as long as this restriction is effective.

(2) This restriction does not require immediate adjustment of orders placed before August 28, 1945. However, in view of its policy to prevent hoarding and speculative buying of materials in short supply, the CPA may direct adjustments or cancellations in individual cases where orders are in excess of reasonably anticipated needs especially where failure to do so might result in unbalanced distribution and curtail total production.

(3) If the inventory limits applying to any material are made more restrictive, whether by a change in Table 1 or otherwise, any person affected must immediately cancel, reduce or defer any order for the material to the extent that the scheduled delivery would result in an inventory greater than permitted by the new restriction and other applicable provisions of this regulation.

(e) *Adjusting outstanding orders when requirements change.* If because of a change in operations, slowing or stoppage of production, delayed delivery by a supplier, or any other change in requirements, a person who has ordered material for future delivery would, if he accepted delivery on the date specified, exceed the limits prescribed by this regulation, he must promptly adjust his outstanding orders, and, if necessary, postpone or cancel them. Paragraph (h) below describes what further deliveries may be accepted.

(f) *Restriction on processing.* No person may process, fabricate, alloy or otherwise alter the shape or form of any material if his inventory of the material in its processed, fabricated, alloyed or otherwise altered shape or form is, or will be, more than a practicable minimum working inventory. However, this does not restrict a person from altering the form of surplus materials by scrapping or reprocessing them, unless a CPA order specifically says otherwise.

Exceptions

(g) *In general.* This paragraph, paragraph (h) below, and certain directions to this regulation state general exceptions to the restrictions on acceptance of delivery described in paragraph (c) above, and to all other inventory restrictions on delivery and acceptance of delivery in CPA orders and regulations unless they contain specific provisions to the contrary. None of these or any other exceptions to CPA inventory restrictions on receipts permit a supplier to disregard any applicable CPA order or regulation which restricts production or delivery.

(1) *Exemption of Table 3 materials.* Materials listed on Table 3 at the end of this regulation may be delivered and accepted without regard to CPA inventory restrictions.

(2) *Materials bought under PR-13.* Priorities Regulation 13 provides a limited exemption from inventory restrictions in the case of items bought on special sales.

(3) *Imported materials.* A person may import any material without regard to CPA inventory restrictions, but if his inventory of it thereby becomes in excess of the amount permitted by this regulation, he may not receive further deliveries of it from domestic sources until his inventory is reduced to permitted levels. The inventory restrictions of this regulation do apply to any deliveries of the imported material he makes, and to the amount of it that any person accepting delivery from him may receive.

(4) *Advance stockpiling for civilian production.* A person may receive in anticipation of starting or resuming civilian production the minimum amount of material he would need during the first 30 days of such production, provided no priorities assistance is used to get the material. Records of such receipts and the basis on which they were computed must be preserved as required by § 944.15 of Priorities Regulation 1. This 30-day amount is a ceiling as far as advance stockpiling is concerned, and may not be considered as a "bonus" to be added to the amount of any material which a producer expects to have available for making his civilian product. Changes in this 30-day amount may be indicated for a particular material by a note in Table 1.

(5) *Minimum sale quantities.* Minimum sale quantities and production runs may be accepted to the extent permitted by Interpretation 2 to this Regulation. However, where Column 3 of Table 1 shows a specific amount of a particular material, that is considered to be the minimum sale quantity of it. Thus, if a person would be permitted under paragraph (c) to accept less than the amount shown, he may accept delivery of the full amount. In any event, after receiving a minimum sale quantity of any material, a person may not accept delivery of any additional quantities until his inventory of it is within applicable limits.

(6) *Small inventory exemption for particular materials.* If a note in Table 1 or 2 shows a specific amount of a particular material as a small inventory exemption, a person may accept delivery of any quantities of it as long as his

total inventory of it after acceptance is no more than the specified amount.

(h) *Receipts permitted after adjustment of orders.* Where a person has promptly adjusted his outstanding orders with his supplier as required by paragraph (e) and the supplier is not otherwise prohibited from producing or delivering any material involved, delivery of it may be made and accepted and the inventory restrictions of paragraph (c) exceeded to the following extent only:

(1) Delivery may be made and accepted if the supplier has shipped the material or loaded it for shipment before the receipt of the instruction to adjust; or

(2) Delivery may be made and accepted of any special item which the supplier actually has in stock or in production or special components or special materials which he has acquired for the purpose of filling that contract. A special item, as used above, means one that the supplier does not usually make, stock, or sell, and which cannot readily be disposed of to others; or

(3) Even if the material is not a special item, delivery may be made by and accepted from a producer if it has already been produced or is in production before receipt of the instruction to adjust, and it cannot be used to fill other orders on the producer's books.

NOTE: For special rules on continuing receipts of special items after contract cut backs, see Direction 3 to this regulation; and as to transfers of idle materials after cancellations or cut backs, see Direction 1. For effect of reduction in consumption rate on permitted inventories, see Interpretation 5.

Miscellaneous Provisions

(i) *Previous inventory authorizations.* Any specific authorizations, exceptions, or grants of appeals issued under § 944.14 of Priorities Regulation 1 or CMP Regulation 2 remain in effect according to their terms unless individually modified or revoked.

(j) *Separate inventories.* (1) In figuring his inventory, a person must include all material in his possession and all material held for his account by another person, but not material held by him for the account of another person.

(2) In the case of a person who on August 28, 1945, has more than one operating unit and keeps separate inventory records for them, this regulation applies to each such operating unit or division independently. A person may not make any further separation or consolidation of such operating units without special written approval of the Civilian Production Administration, unless it is purely incidental to a separation or consolidation which is made primarily for other than inventory purposes.

(k) *Redistribution of excess inventories.* Excess inventories of materials and products, including inventories of materials which are in such form as to be unusable by the holder, are subject to redistribution to other persons by voluntary action pursuant to Priorities Regulation 13, or if necessary for national defense, through requisitioning by the Civilian Production Administration.

(l) *Violations.* Any person who wilfully violates any provision of this regulation, or who, in connection with this regulation, wilfully conceals a material

fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(m) *Revisions of tables.* Tables 1, 2 and 3, attached to this regulation will be revised from time to time. As materials and products become in more ample supply, it is expected that they will be listed on Table 3. In special cases, particular materials or products may also be removed from Table 3 or added to Table 1. It is, therefore, important to be familiar with the latest revision of the tables.

(n) *Appeals, letters and questions.* Any appeal or other question regarding any provision of this regulation should be sent by letter in duplicate to the Inventory Control Division, Civilian Production Administration, Washington 25, D. C., Ref.: PR 32, unless Table 1 or 2 attached to this regulation indicates otherwise with respect to particular materials or classes of persons.

Issued this 8th day of March 1946.

ADMINISTRATION,

Recording Secretary.

TABLE 1—MATERIALS AND PRODUCTS SUBJECT TO SPECIFIC INVENTORY PROVISIONS

Explanation. Materials or products listed in Column 1 are subject to the specific inventory provisions shown, as explained in paragraph (c) (2) of the regulation, except to the extent that different rules may apply as to certain classes of persons under Table 2.

Column 2 shows either the CPA order or regulation which controls inventories of the material, or if no order is specified, there is shown a period of time representing the maximum inventory permitted as explained in paragraph (c) (2). An asterisk (*) indicates that the practicable minimum working inventory limit of paragraph (c) (1) also applies, that is, if it would be less than the specific limit indicated.

If Column 2 shows a specific period of time (e. g., 30 days, 60 days, etc.) for a particular material or product, this restriction applies only to "users" of that material or product, i. e., persons, including Government operated consuming establishments, who use the material or product for production, operating supplies, maintenance and repair, or for construction whether for own account or for the account of another. In addition, the restriction applies only within the 48 States and the District of Columbia. In the case of persons who are not "users", such as persons buying for resale, paragraph (c) (1) applies instead of Column 2.

A figure in Column 3 shows the minimum sale quantity, that is, the amount of the particular material which a person may receive under the conditions stated in paragraph (g) (5), even if it is more than allowed under Column 2. If no figure is shown, the rule in Interpretation 2 must be followed.

Column 4 tells the Division or Office in the Civilian Production Administration to which should be sent any appeals or questions regarding the limitations described. However, if the applicable order says appeals are to be filed somewhere else, such as the nearest CPA field office, that provision controls.

Column 5 (Remarks) gives explanations, exemptions or other special rules applicable to the particular material or limitation.

INTERPRETATION 1

INVENTORIES IN SEASONAL INDUSTRIES

Paragraph (c) (1) of Priorities Regulation 32 prohibits any person from accepting a delivery which will give him "more than a practicable minimum working inventory reasonably necessary to meet his own deliveries on the basis of his current or scheduled method and rate of operation". This does not prevent a person engaged in a seasonal industry who normally stocks up inventory in advance of the season from accepting delivery of his requirements of the inventory in question, provided (a) that he is not guilty of hoarding, and (b) that the deliveries accepted are no greater and no further in advance than those which he would normally accept in the ordinary course of his business to meet reasonably anticipated requirements. (Issued Aug. 28, 1945.)

INTERPRETATION 2

MINIMUM SALE QUANTITIES AND PRODUCTION RUNS

(a) *Applicable provisions of the regulations.* Priorities Regulation 32 forbids the making or acceptance of a delivery which will give the customer more than the "practicable minimum working inventory reasonably necessary" for him to make his own deliveries. A similar provision in paragraph (c) (2) of Priorities Regulation No. 3 says that a customer who is applying a rating for which no specific quantities have been authorized may use it only to get the "minimum amount needed."

(b) *Factors to be considered in determining how much can be ordered and delivered.* In determining a customer's minimum inventory "reasonably necessary" under Priorities Regulation 32 or his "minimum amount needed" under Priorities Regulation No. 3, it is proper in some cases to consider not only the immediate needs of the customer's plant but also whether the amount which he orders will be a minimum production run for his supplier. The customer may order and receive (and the supplier may deliver) the customer's requirements for a longer period in advance than he actually needs at the time of delivery if, but only if, it is not practicable for him to get the item from any supplier in the smaller quantities which he presently needs. The supplier may reject his customer's order if it is less than the minimum which he regularly sells or less than his minimum production run of a product which is mass produced under the conditions explained in Interpretation 3 of Priorities Regulation 1.

(c) *Relief in exceptional cases.* If the conditions stated in paragraph (b) above cannot be satisfied but the customer wants to order or accept delivery of more than his actual needs at the time of delivery, he should apply to the Civilian Production Administration for permission, stating the facts and why it is not practicable to satisfy the condition of paragraph (b).

(d) *Special provisions for certain materials.* Where a specific minimum sale quantity is shown in Column 3 of Table 1 of Priorities Regulation 32 with respect to any material or product, that quantity controls instead of the rule in this interpretation.

(e) *Specific limits on ratings may not be exceeded.* This interpretation does not apply to the use of a rating where a specific quan-

tity is stated in the instrument assigning the rating. If a person is assigned a rating for a specific amount of material, he may not use it to get more. If he finds that he can only get the material in larger quantities, he should apply for a modification of the rating.

(f) *No effect on contractual rights.* The times and amounts in which deliveries are to be made are to be determined by agreement between the supplier and the customer. Nothing in this interpretation relieves a supplier from fulfilling a contract to make deliveries at specified times in specified amounts. For example, if a customer has agreed to buy and a supplier has agreed to furnish 100 units a month for six months, this interpretation does not obligate the buyer to accept 600 units delivered during the first month, although it permits him to do so under the conditions described in paragraph (b). (Issued Oct. 1, 1945.)

INTERPRETATION 3

MAKING OR DELIVERING MATERIAL EARLIER THAN REQUIRED BY CUSTOMERS

(a) Paragraph (b) of Priorities Regulation 32 prohibits a person from knowingly making a delivery which will give his customer more than the latter is permitted to receive under the regulation. Paragraph (f) of that regulation prohibits a person from processing or fabricating material if his inventory of the material in its processed or fabricated form will be more than a practicable minimum working inventory. These two restrictions should be borne in mind by any supplier who wants to make or deliver any material to his customer earlier or in greater quantities than required by the customer.

(b) For example: A supplier has accepted his customer's order of a product to be delivered at the rate of 100 a month for six months. The supplier would like to ship 200 a month for three months, or perhaps, the entire 600 in the first month. Since the customer's requirements of 100 a month are presumably all he could accept within the inventory limitations of paragraph (c) of the regulation, the requirement that the supplier may not knowingly ship more than this would prevent him from delivering earlier than required by his customer, unless he received notice from his customer that the receipt of the larger amount would not cause him to have an excess inventory.

(c) Thus, before delivering a material or product substantially earlier or in greater quantities than is called for by his customer's order, a supplier is required to satisfy himself that the receipt by the customer of the changed quantities will be within the permissible inventory limitations applicable to the customer. The supplier may rely on any statement or notice to this effect from his customer, unless he knows or has reason to know that it is false.

(d) Similarly, assuming his customer would not be permitted to receive the larger quantities, the supplier should take this into account in his plans for processing the material or product so that he himself will not have an inventory greater than permitted by paragraph (f) of the regulation.

(e) This interpretation, of course, does not change the rule on delivery or acceptance of minimum sale quantities or production runs to the extent described in Interpretation 2 to this regulation, nor does it prevent earlier delivery of iron products, steel, copper and copper base alloys under the conditions described in paragraph (c) (3) of Priorities Regulation 32. Also, if any CPA order or regulation permits increased deliveries to the extent necessary to avoid shipping partly filled containers (such as paragraph (y) (4) of Order M-300), the rule in this interpretation does not prevent such deliveries. (Issued Oct. 1, 1945.)

INTERPRETATION 4
INVENTORY MATERIAL

(a) Paragraph (c) of Priorities Regulation 32 prohibits a person from accepting delivery of material if his inventory of it is, or will be, greater than the maximum prescribed. For the purpose of this regulation, material is considered to be inventory until it is actually put into process or is actually installed or assembled. Putting into process does not include minor initial operations, such as painting, and does not include any shearing, cutting, trimming or other operation unless such initial operations are part of a continuous fabricating or assembling operation. Nor does it include operations such as inspection, testing and ageing nor segregation or earmarking for a specific job or operation.

(b) For example, if a manufacturer who uses wire or rod cuts a sufficient quantity of it to length at one time to maintain his operations for a considerable period of time, the cut pieces remain as inventory until processed into another form or until assembled or installed.

(c) If a manufacturer purchases and stores steel castings in the form purchased, the steel castings are not put into process when the castings are painted and stored. Consequently, the inventory of castings includes those painted and stored.

(d) If a manufacturer shears steel sheet and stocks in sheared form, such stock is still part of his inventory, if the material does not continue in production. (Issued Aug. 28, 1945)

INTERPRETATION 5**EFFECT OF REDUCTION IN CONSUMPTION RATE ON PERMITTED INVENTORIES**

(a) Paragraph (c) of Priorities Regulation 32 prohibits the acceptance of delivery of material if a person's inventory of it is, or will be, more than the amount permitted by the regulation. If material is acquired within these restrictions, the regulation does not prohibit the mere possession of an inventory if a change in circumstances makes it greater than the amount permitted. For instance, if based upon current rate of production a manufacturer's permitted inventory of one item of steel is 100 tons and he has in inventory 60 tons, he may receive a further delivery of 40 tons. If after receiving the delivery of 40 tons his rate of consumption, because of contract cancellation or the like, is reduced drastically, the mere fact that he has an inventory of 100 tons, although his permitted inventory may be only 10 tons, is not a violation of the regulation. He may not, of course, accept any further deliveries of that item of steel until his inventory has been reduced below 10 tons

(except as provided in paragraph (h) of Priorities Regulation 32 and Direction 3 to that regulation, relating to material already shipped, special items, etc.)

(b) Similarly, the regulation does not affect the liability of a customer for material in inventory when the customer cancels his contract. Such liability is controlled by the provisions of the contract between the customer and his supplier and by contract law. (Issued Aug. 28, 1945)

(3) *Adjustment in maximum rent for decreases.* The order on any petition under this paragraph (b) may require an appropriate adjustment in the maximum rent; and any maximum rent for which a report is required by this paragraph (b) may be decreased in accordance with the provisions of section 5 (c) (3).

If the landlord fails to file the petition or report required by this paragraph (b) within the time specified, or decreases the services, furniture, furnishings, or equipment without an order authorizing such decrease where such order is required, the rent received by the landlord for any rental period commencing on or after such decrease or the effective date of regulation, whichever is later, shall be received subject to refund to the tenant of any amount in excess of the maximum rent which may later be fixed by any order decreasing the maximum rent on account of such decrease in services, furniture, furnishings, or equipment. Such amount shall be refunded to the tenant within 30 days after the date of issuance of the order unless the refund is stayed in accordance with the provisions of § 1300.209 or 1300.217 of Revised Procedural Regulation No. 3. If the Administrator finds that the landlord was not at fault in failing to comply with this paragraph (b), the order may relieve the landlord of the duty to refund. The foregoing provisions and any refund thereunder do not affect any civil or criminal liability provided by the act for failure to comply with any requirement of this paragraph (b).

This amendment shall become effective March 9, 1946.

Issued this 7th day of March 1946.

ADJUSTMENT OF MAXIMUM PRICES FOR SALES OF CERTAIN LOW-END CONSUMER DURABLE GOODS

A statement of the considerations involved in the issuance of this supplementary order, issued simultaneously herewith, has been filed with the Division of the Federal Register.

2. Low-end articles covered by this order.
3. When a maximum price may be adjusted under this order.
4. Amount of the adjustment.

Sec.

5. How the adjustment shall be granted.
6. Revocation or amendment.

AUTHORITY. § 1305.176 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 108, 79th Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4881; E.O. 9599, 10 F.R. 10155, E.O. 9651, 10 F.R. 13487.

SECTION 1. Purpose. The purpose of this order is to authorize individual adjustments in manufacturers' maximum prices to remove price impediments to the continued supply of certain low-end consumer durable goods.

SEC. 2. Low-end articles covered by this order. The low-end articles covered by this order are divided into two groups:

Appendix A lists articles whose maximum prices may be adjusted if they do not exceed the appropriate "cut-off" price for the commodity. Cut-off prices listed in Appendix A are for sales to the particular class of purchasers designated. Cut-off prices to other classes of purchasers shall be prices which reflect the manufacturer's customary or established differentials for sales to those other classes of purchasers. If, for any reason, the manufacturer has no such customary or established differentials, the Office of Price Administration will, upon request, advise him as to the appropriate cut-off prices to any other classes of purchasers which reflect customary trade differentials.

Appendix B lists articles whose maximum prices may be adjusted when it appears that the manufacturer's maximum price is below the prevailing level of maximum prices of other manufacturers for sales of the same or substantially the same article to purchasers of the same class.

SEC. 3. When a maximum price may be adjusted under this order. (a) A manufacturer's maximum price for a low-end article may be adjusted under this order if his maximum price, including any adjustments previously authorized by the Office of Price Administration, is below the adjusted maximum price for which he can qualify under this order. Maximum prices for low-end articles made by a "reconverting manufacturer" as defined in section 2 of Revised Supplementary Order No. 119 may be adjusted under this order only after the manufacturer has had three months of production experience.

(b) Any order adjusting a manufacturer's maximum price under this order may make appropriate adjustments in the maximum prices of persons who purchase the article for resale.

(c) Certain articles whose maximum price may be adjusted under this order are covered by other orders or regulations which provide for the pre-ticketing of the article with its retail ceiling price and the calculating by the manufacturer of retail and wholesale ceiling prices by the use of markups over the manufacturer's ceiling price. In the case of those articles, the manufacturer shall compute resellers' ceiling prices under such orders or regulations on the basis of his adjusted maximum prices permitted by this order and shall comply with their tagging requirements and all other applicable provisions of those orders or regulations.

SEC. 4. Amount of the adjustment.

(a) A manufacturer's maximum price for a low-end article may be adjusted to an amount sufficient to cover his "total unit cost to make and sell" the article plus one-half the industry's average profit margin during a normal peacetime period. The profit factors applicable to certain articles are set forth in Appendices A and B. If a profit factor is not listed in the Appendix, one-half the manufacturer's own average profit margin during the period 1936-1939 may be used; or if the manufacturer was not making the same type of product during that period, the Price Administrator will determine an appropriate profit factor to be used by reference to the average earnings of an appropriate comparable industry.

(1) "Total unit cost to make and sell" means the total current cost of direct materials, direct labor, reasonable factory overhead, and reasonable general administrative and selling expenses, applicable to the article. (Prices used in computing material cost may not be higher than the ceiling prices of the manufacturer's normal sources of supply for sales in customary quantities. Labor rates used in computing labor cost may not be higher than the manufacturer's legal straight time wage rates, and may not include wage increases which have not been approved for use as a basis for price increases under the regulations of the Office of Stabilization Administration.) If a manufacturer produces several variations of an article (whose maximum price is to be adjusted under this order) which, although they differ in minor respects resulting in differences in production costs, have the same maximum price, the total unit cost to make and sell the lowest cost item shall be considered to be the total unit cost to make and sell the article.

(2) The total unit cost submitted may be revised by the Price Administrator in whole or in part if it appears to be out of line with the total unit costs of other manufacturers, if it has not been prepared to reflect actual costs in accordance with accepted accounting procedures, or if, in the case of a reconverting manufacturer it is inconsistent with the costs which are recognized as allowable under Revised Supplementary Order 119.

(b) For articles listed in Appendix A, adjusted maximum prices may be stated in the order authorizing the adjustment as either dollar-and-cent amounts, or (where the manufacturer produces many low-end articles of the same type and he has complied with section 5 (b)) as a percentage increase factor applicable to all low-end articles of the same type which he manufactures. In no case, however, may an adjusted maximum price authorized under this order for those articles exceed the lower of the following two amounts:

(1) The appropriate dollar-and-cents cut-off price; or

(2) The manufacturer's previous maximum price (exclusive of any individual price adjustment which may have been granted him) plus the maximum percentage adjustment set forth for the article in Appendix A, if any.

(c) For articles listed in Appendix B, an adjusted maximum price authorized under this order may not exceed the lowest maximum price, for sales to purchasers of the same class of the same or substantially the same article currently being produced by any other manufacturer, which falls within the range of prices constituting the prevailing level of maximum prices for that article.

NOTE: For example, if there are eight manufacturers with prices as follows: 10¢, 11¢, two at 14¢, two at 15¢, 16¢ and 19¢, the range of prices in the prevailing level would be from 14¢ to 16¢ and 14¢ would be the cut-off.

SEC. 5. How the adjustment shall be granted. (a) A manufacturer of an article covered by this order who wishes an adjustment of his maximum price should file an application for adjustment on OPA Form 606-2718 giving all the information required by that form, and showing adjusted maximum prices computed in accordance with that form. The application shall be filed in duplicate with the Office of Price Administration, Consumer Goods Price Division, Washington 25, D. C.

(b) If a manufacturer has so many low-end articles of one type that it would be an undue administrative burden for him to submit costs for each individual article, he may (prior to filing an application under this order) request OPA to supply him with instructions covering the preparation of a consolidated application with supporting cost information on the basis of which an "increase factor" may be determined to be applied uniformly to all his low-end articles of that type.

(c) At any time after the filing of an application, the Office of Price Administration may issue an order, not to apply retroactively, adjusting the maximum prices of articles described in that application.

(d) No commodity, for which an adjustment is requested under the provisions of this order may be sold at a price higher than its existing maximum prices (except as provided in paragraph (e) below) until an adjustment in the maximum price has been authorized by order of the Office of Price Administration issued under this supplementary order.

(e) A manufacturer who has applied under the provisions of this order for an adjustment of his maximum prices for an article listed under Appendix A, may, 20 days after the filing of such application, in the absence of notification by the Office of Price Administration to the contrary, sell and deliver the articles covered by that application at the adjusted prices computed in his application, or at his existing maximum prices plus 10%, whichever is lower; *Provided*, That the figures furnished on OPA Form 606-2718 and computations based thereon have been made in good faith and that the adjusted prices do not exceed the cut-off price or maximum percentage adjustment given in the appendix for that article. The adjusted maximum prices as computed by the manufacturer are subject to downward revision by the manufacturer are subject to downward revision by the Office of Price Administration at any time.

SEC. 6. Revocation or amendment. This supplementary order may be revoked or amended by the Price Administrator at any time.

APPENDIX A

In this appendix are listed categories of low-end articles on which adjustments may be granted when their maximum prices are below the appropriate cut-off prices. Unless otherwise stated the cut-off prices in Column II are for sales by the manufacturer to jobbers or equivalent large volume classes of purchasers; cut-off prices to other classes of purchasers shall be determined according to section 2 of the order. These cut-off prices limit the amount of adjustment which may be granted since no adjusted price may be greater than the appropriate cut-off price.

In the case of certain articles, Column III states maximum percentages. A manufacturer's adjusted maximum prices for those articles may not exceed either the given maximum percentage over his existing maximum prices (exclusive of any individual adjustment he may have previously been granted), or the appropriate cut-off price.

In Column IV (and also in Appendix B) are listed the profit margin factors which are to be used in calculating adjusted maximum prices under this order. Each factor represents one-half the average earnings (net profits before taxes over total cost) for the years 1936-1939 of the industry producing that particular article as determined by the Administrator.

NOTE: Attention is directed to the fact that these factors do not disclose the relative profitability of the industries represented. Profitability is measured by rate of return on net worth or investment. This in turn depends not merely on the ratio of the margin between net income and total costs to total costs, which is reflected in the listed figures, but also on the rate of turnover of the product and the net worth of, or investment in, the industry.

Carriers using punch card accounting machines will experience no difficulty in securing the data necessary for reporting these statistics.

Carriers not using punch card accounting machines will have to secure this data manually by sorting out the freight bills which were:

- (1) Originated by the carrier and delivered to a connecting carrier;

¹ Peddle trips are those operated primarily for the purpose of pick-up or delivery of freight at shipper's or consignee's platform to intermediate stations outside the city, town or commercial zone (including contiguous areas).

(2) Received from a connecting carrier and terminated by reporting carrier;

(3) Received from a connecting carrier and delivered to a connecting carrier;

and the remainder will represent those shipments originated and terminated by the reporting carrier. Adding machine tapes should be run on the first three classes for both revenue and weight. If done on a daily or weekly basis by each terminal and summaries forwarded to the home office, where all terminal summaries will be summarized for the reporting period, it will not be burdensome.

TITLE 50—WILDLIFE

Chapter I—Fish and Wildlife Service

Subchapter Q—Alaska Commercial Fisheries

PART 201—ALASKA FISHERIES GENERAL REGULATIONS

DETERMINATION OF DISPUTES OVER TRAP LOCATIONS

1. In order to secure the conservation of the salmon supply of Alaska in a manner consistent with the requirements and purposes of the act of June 6, 1924 (43 Stat. 464) and related legislation, to prevent the development of monopoly and the maintenance of exclusive rights in the maritime public domain in violation of such acts, and to provide machinery which in this and subsequent years will permit the determination of disputes over trap locations with the least possible disruption to the catching and processing of salmon, the following sections will be included in the 1946 Alaska Commercial Fishing Regulations:

§ 201.24 *Filing of trap site locations.* On or before April 15, 1946, any person who has obtained or applied for a permit from the War Department for the occupation of a trap site may file with the Regional Director of the Fish and Wildlife Service at Juneau notice of this fact and of its location. Failure to file such notice shall be cause for closing the trap of such permit holder if there be a competing permit holder who has filed such a notice.

§ 201.25 *Determination and closing competing trap operations.* In case there shall be two or more permit holders for a single site, the Regional Director shall give notice of this fact to all conflicting permit holders who have filed notices under the preceding section. Any permit holder who has filed such a notice may request, through the Regional Director, the Secretary of the Interior or his authorized representative to determine, prior to the opening of the fishing season, which of the permit holders is entitled to occupy the site for the coming season. The Secretary or his representative, upon such a request, may call for affidavits or other evidence showing the interests and equities of the competing applicants, and shall determine and announce the action which the Fish and Wildlife Service will take with respect to closing the competing traps after opening of the fishing season. This determination will be based upon (a) the provisions of

§ 201.25, (b) any applicable law or regulation of the United States or the Territory of Alaska then in effect, or (c) the policy hitherto established of closing all traps in the area of conflict pending a judicial determination or other settlement.

§ 201.26 *Limitation on increase of individual trap site operations.* No person shall be permitted to increase the number of trap sites which he occupies over the number occupied in the preceding season if such increase would result in his occupation of more than 10 sites. The Secretary or his authorized representative may, however, in exceptional cases authorize such an increase for the 1946 season upon good cause shown. Any trap site occupied in violation of this section will be closed.

§ 201.27 *Definitions.* As used in §§ 201.24 to 201.26:

(a) "Person" and "permit holder" include individual, firm, association, partnership, or corporation.

(b) "Occupation" of a trap site means the care, service, and use of a trap by the permit holder, whether the trap be installed by him or another.

2. Notice is hereby given that, subject to any change of policy resulting from the hearings announced in paragraph 3 of this notice, the Alaska Fishing Regulations for 1947 will contain provisions which will serve to exclude from any trap site a person who held a permit for that site in 1946 and who did not himself occupy such site but instead leased or assigned such site to another person under arrangements by which the permit holder did not bear all or a substantial part of the expenses and financial risk involved in the installation, care, service, and use of the trap.

3. Subject to future changes, the hearings commenced on February 21, 1946, at Washington, D. C., will be resumed in Alaska in October, 1946, and will be directed to the following subjects for consideration with reference to the 1947 regulations:

(a) Limitation of the number of trap sites which may be occupied by a single owner.

(b) Preference in the allocation of trap sites to small operators and for residents, communities, and cooperatives of Alaska.

(c) The provision forecasted in paragraph 2 of this notice.

(d) The machinery by which any limitation or preference might be accomplished.

The Department of the Interior will endeavor to announce the terms of the regulations proposed for discussion and the places and times of the hearings at least 30 days in advance of the first of such hearings.

OPINION TO ACCOMPANY THE NOTICE OF AMENDMENTS TO THE ALASKA COMMERCIAL FISHING REGULATIONS FOR 1946

On February 21, 22, 23, and 25, 1946, public hearings were held in Washington on proposed amendments to the Alaska Commercial Fishing Regulations for 1946. The pro-

posals, issued on January 31, included (1) a limitation to twenty of the trap sites which could be occupied by one person; (2) a prohibition of any increase in the sites occupied by one person which would bring his total number to more than ten; and (3) a system of preference to be applicable in determining who might occupy sites, preference being given to persons already occupying no more than ten sites and to residents of Alaska.

For reasons hereafter detailed, it has been determined that no action should be taken at this time either to impose an upper limit on trap site holdings or to establish a general system of preferences with respect to the occupancy of trap sites. Certain minimal measures appear, however, to be required in 1946 to prevent a deterioration in the current situation. The regulations for 1946 will forbid any increase in the concentration of control over trap sites during the coming year, and will establish, largely for experimental purposes, machinery for the resolution of the few disputes which may arise in 1946 over trap site occupancy.

Under the regulations issued by the Fish and Wildlife Service of this Department, the fishing season in Alaska lasts an average of thirty to forty days; it opens at varying times in the several districts, commencing in the latter part of May. Evidence at the hearings established that it was necessary to secure gear, crews, supplies, and piling in the United States. In order to have the traps in working condition by the opening of the season, these items must be shipped beginning as early as the middle of March. A heavy pre-season investment has already been made by last year's occupants. It appears unlikely, if sites were to be thrown open to competition by imposition of a twenty-trap limitation or by a preference for small operators or residents, that they could be supplied with traps and effectively occupied by newcomers in 1946. The uncertainty as to which sites would or should be subjected to competition and the practical difficulties of time and cost would inevitably result in a curtailment of the output of canned salmon this year, and this result the Department is not willing to create or permit in view of the serious international food shortage. On the other hand, to prohibit occupants of ten or more sites from acquiring additional sites would effect no discernible change in volume of 1946 production and is in my opinion a desirable provision to guard against any increase in the concentration of private control over an extremely valuable part of the public domain.

It developed in the course of the hearings that a comparatively small number of those who held War Department permits for the trap sites did not themselves operate the traps, but simply leased, for a substantial rental, the rights to use the site. There can be no defense of a system under which a private individual is able to lease for a profit a part of the public domain, even though its strategic location were ascertained through the effort and expense of the individual, and the practice should be stopped as soon as possible. If, however, these leased sites were closed in 1946 there would be an adverse effect upon salmon production. The notice of January 31 contained, moreover, no provision which was directed to this practice, and I have been impressed by the view that the beneficiaries of this system, however indefensible it may appear, are entitled to be heard before the system is changed. It accordingly seems best to defer action until the 1947 season, and merely to serve notice at this time that the permit holder who leases rather than operates his trap site in 1946 is not likely to be allowed to occupy the site in 1947.

Previous regulations of the Department, issued under authority of the White Act (Act of June 6, 1924, 43 Stat. 464), have in the large been directed exclusively to the conservation aspects of that act. The fact remains, however, that the White Act was also designed to bring about the dissolution of monopoly holdings which by 1924 had developed under the so-called "reservation" system. Although the conservation program has succeeded in reducing the number of trap sites to 440, from 799 in 1924, 221 of those sites are now occupied by eight companies, and for some years no trap sites have been available to newcomers in the field. This is a condition which the Department, as the guardian of the public resources, is anxious to see corrected. Any thorough-going revision of the regulations, however, deserves the most careful study before it should be promulgated. The time and expense required to travel to Washington prevented more than a token representation of the many Alaskan residents who are engaged in the fishing industry. For these reasons, it is proposed that the departmental hearings shall be resumed in Alaska, after the close of the 1946 fishing season, in order to consider regulations for 1947.

Administrative regulation or statutory action in this field is not confined to the Federal Government. The White Act expressly disclaims any intention to deny to the Legislature of Alaska the power to regulate the fishing industry by licensing or taxation. The Territorial Legislature is now meeting in special session. In accordance with the Department's policy of favoring increased legislative responsibility in the territorial areas, it is appropriate and desirable that an opportunity be given the Alaskan Legislature to enact suitable legislation to deal with this problem. Appropriate and effective action by the Legislature may obviate the necessity for any very extensive changes in the 1947 regulations.

OSCAR L. CHAPMAN,
Acting Secretary of the Interior.

TRADE SALES PAINTS

ADJUSTMENT OF MAXIMUM PRICES

An opinion accompanying this amendment has been issued simultaneously

herewith and filed with the Division of the Federal Register.

Paragraph (a) of Order No. A-2 under § 1499.159 (b) of Maximum Price Regulation 188 is amended by adding the following new subparagraph:

(20) *Trade sales paints.* (As used herein "trade sales paints" means the types of paint sold through channels of distribution to householders, farmers, painting contractors, etc., as distinguished from "industrial paints" which are sold to industrial consumers for the finishing of products such as automobiles, refrigerators, railroad equipment, etc.).

(i) *Scope of this subparagraph.* This adjustment provision permits granting of relief to a manufacturer of trade sales paints whose maximum prices therefor cause him substantial hardship.

(ii) *Extent of relief.* Any adjustment granted hereunder will ordinarily be limited in accordance with the existing degree of substantial hardship as set forth below: (Furthermore, in general, no maximum price will be increased to a level in excess of the general level of maximum prices prevailing for similar trade sales paints in the market area involved).

(a) To an amount sufficient to make the adjusted price per unit equal to the total current factory costs per unit where applicant's current over-all profits on an annual basis are at least 15 percent greater than his average annual base period over-all profits. (As used therein "over-all profits" means over-all profits adjusted for changes in investment and before deductions of income and excess profit taxes; "base period" means 1936-1939 inclusive, or any other period which is determined by the Office of Price Administration to be representative).

(b) To an amount sufficient to make the adjusted price per unit equal to the total of current factory costs and general administrative and selling expenses per unit, where applicant's current over-all profits on an annual basis are less than 15 percent greater, but not less, than his average annual over-all profits during the base period, but not in excess of an amount which will cause his current over-all profits on an annual basis to equal 115 percent of his average annual over-all profits during such base period.

(c) To an amount sufficient to make the adjusted price per unit equal to the total of current factory costs and general administrative and selling expenses per unit, plus a reasonable margin of profit per unit, where applicant's current over-all profits on an annual basis are less than his average annual over-all profits during the base period, but not in excess of an amount which will cause his current over-all profits on an annual basis to equal 115 percent of his average annual over-all profits during such base period.

(iii) *Filing of applications.* Applications under this subparagraph shall be filed with the Office of Price Administration, Chemicals and Drugs Price Branch, Washington 25, D. C., in accordance with the provisions of Revised Procedural Regulation No. 1, and shall in-

clude substantially the same information called for by OPA Form 692-992 (used in applications for adjustment under § 1499.75 (a) (18) of Supplementary Regulation 15) which is incorporated herein and made a part hereof.

(iv) *Adjustment order.* The Price Administrator may by order grant or deny, in whole or in part, any application for adjustment under this subparagraph (20), and may revoke or amend any such order at any time. In connection with any such adjustment the Price Administrator may also adjust the maximum prices for resellers, and in appropriate cases may require a compensatory decrease in the maximum prices for another product or products manufactured by the applicant.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

This amendment shall become effective March 13, 1946.

Issued this 8th day of March 1946.

MANUFACTURERS' AND JOBBERS' MAXIMUM PRICES

For the reasons set forth in an opinion issued simultaneously herewith, and filed with the Division of the Federal Register, and pursuant to § 1499.159b of Maximum Price Regulation No. 188, *It is ordered, That Order No. 1509 under § 1499.159b of Maximum Price Regulation No. 188 be, and the same hereby is, amended in the following respects:*

1. Paragraph (p) is amended to read as follows:

(p) *Manufacturers' maximum prices which cannot be determined under another paragraph of this order (such as other models and other classes of purchasers).* After March 12, 1946, a manufacturer shall not sell, offer to sell, deliver or offer to deliver any article covered by this order for sales of which maximum prices have not been established under paragraphs (h), (k), or (n), of this order, or under an order of the Office of Price Administration, until he has applied to the Office of Price Administration, Washington, D. C., for the establishment of his maximum prices for such sales, and until such maximum prices have been established by an order of the Office of Price Administration, or the waiting period referred to below has terminated, and the manufacturer has received no notification from the Office of Price Administration. The application shall set forth (unless the information has already been furnished to the Office of Price Administration, in which case the date and the office to which it was furnished, shall be stated):

(1) The identifying number or trade name of the article to be priced.

(2) The reasons why the article to be priced cannot be priced under any other paragraph of this order.

(3) The detailed specifications and an illustration of the article to be priced.

(4) An itemized breakdown of the manufacturer's current unit direct cost of the article to be priced, showing separately according to his own system of accounts or regularly prepared operating statements all major component unit direct cost factors. For the purpose of this order, unit direct costs include direct labor and direct material costs but do not include factory burden (sometimes called factory overhead or indirect manufacturing expenses), packing and crating costs, royalties and patterns, tool and die cost and items of administrative, general and selling expenses. Also, the number of units of production upon which the unit direct costs were based.

(5) An itemized breakdown of the manufacturer's current unit direct cost (as described in (4) above) of the basic model, specifically priced in this order, which is most nearly comparable to the article being priced.

(6) Price lists in effect during March 1942 showing:

(i) The article most nearly comparable to the article being priced, with illustrations;

(ii) The article most nearly comparable to the basic model mentioned in (4), with illustrations;

(iii) All price differentials covering variations in these constructions.

If the manufacturer was not making and selling upholstered dual purpose sleeping equipment in March 1942, he shall send the first price list which was in effect after March 1942, together with illustrations.

(7) A statement of the manufacturer's customary discounts, allowances and other price differentials to different classes of purchasers in effect for sales of upholstered dual purpose sleeping equipment during March 1942, or if the manufacturer was not making and selling upholstered dual purpose sleeping equipment during March 1942, the same information for the first period after March 1942 during which the manufacturer was engaged in this business.

(8) The proposed maximum prices to each class of purchaser for the article to be priced, and a statement of why the manufacturer believes those prices to be in line with the level of maximum prices established by this order.

Those proposed maximum prices shall be calculated as follows:

Step 1: The manufacturer shall determine the "unit direct cost" for the article being priced.

Step 2: The manufacturer shall select the comparable article for which maximum prices have already been established in paragraph (h), (k), or (n), which has a unit direct cost closest to the unit direct cost of the article being priced.

Step 3: The manufacturer shall determine the percentage markup over unit direct cost for the comparable article selected.

Step 4: The manufacturer shall apply to the unit direct cost of the article being priced

that percentage markup. The resulting price shall be the f. o. b. factory, i. c. l. maximum prices for sales of the new article to retailers.

In the absence of a contrary direction from the Office of Price Administration within 15 days after mailing his application, the manufacturer may offer the article in question for sale at the proposed maximum prices stated therein. If such proposed maximum prices are correctly computed they shall be subject to adjustment (but not retroactively) at any time by order of the Office of Price Administration if it appears that the maximum prices so established are out of line with the general level of prices established by this order. If the prices are incorrectly computed, the maximum prices for a sale, offer to sell, or delivery of an article made pursuant to the incorrect report shall be the maximum prices which are properly computed under the formula contained in this paragraph.

2. Paragraph (v) is added to read as follows:

(v) *Establishment of maximum prices in certain cases.* If any seller subject to this order fails to make the application for price approval which this order requires in certain instances, the Office of Price Administration may, either upon application, or upon its own motion, issue orders under this paragraph establishing maximum prices which are in line with the level of maximum prices established by this order. Maximum prices, so established, shall be effective as of the date of first sale.

This amendment shall become effective March 13, 1946.

Note: The reporting provisions of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 8th day of March 1946.

Administrator.

Notice is further given that any interested person may, not later than March 21, 1946, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request and the nature of his interest, or may request that he be notified if the Commission should order a hearing thereon. All interested persons are referred to said declaration, which is on file in the office of the Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Dayton proposes to amend its articles so as to provide (i) that in the event that four quarterly dividends upon its cumulative preferred stock should ever be in arrears, the preferred stockholders will have the right, voting separately as a class, to elect the majority of the Board

of Directors, thus changing the existing articles which provide that in such event preferred stockholders have only the right to vote share-for-share with the holders of the common stock; and (ii) that the express terms and provisions of the cumulative preferred stock may not be changed in any manner substantially prejudicial to the holders thereof except with the consent of the holders of two-thirds of the outstanding preferred stock, thus changing the existing articles which require the consent of two-thirds of the holders of the preferred stock for any change in the express terms and provisions of the preferred stock, whether or not such change is prejudicial to the preferred stock.

The management also proposes to solicit the holders of the cumulative preferred stock for proxies in favor of the proposed amendment of the articles.
